

## CertainTeed Machine Works Your Partner for Spray Foam Service and Equipment

We've spent many years building and servicing fully mounted spray insulation systems so we know the essentials of making a great rig.

Configuration and setup are the keys to your success and must be determined with great care and know-how for a safe, efficient rig that will provide many years of service. Each rig is customized depending on the type of insulation and the equipment needed to install it. We know all the options so no matter what type of spray insulation your business handles, you can rely on our expertise to deliver an application system optimized for performance and efficiency.

We walk you through the process from inception through delivery and product support. We'll even call in our trucking partners to help you purchase the best truck to make your rig buying experience as painless and rewarding as possible.

Check out our service and parts departments and see how we support you and help you keep your spray insulation business running. From your first inquiry about owning your own custom rig, through build, delivery and ultimate usage and service, we've got you covered.

### Need a Spray Foam Rig?

CertainTeed Machine Works can build customized SPF set-ups for a wide variety of vehicle configurations. Whether you need a system that fits into a 16-foot trailer or a portable cart-mounted unit, we'll work with you to specify the right components. Send us an email at [cmw@saint-gobain.com](mailto:cmw@saint-gobain.com) or give us a call and we'll fill you in on the details.

### Parts and Service

As an authorized Graco and Dynasolve distributor, we keep you spraying. Our fully stocked parts department usually has your item in stock and ready to ship to you overnight so your business can run smoothly with less downtime.

Call us today at 800-237-7841

CertainTeed Machine Works offers a comprehensive line of commercial and residential insulation and fireproofing application equipment, including blowing machines, spray foam systems, vacuums and accessories. We provide equipment installation, troubleshooting and repair, custom machine design services, and same-day shipping of spare parts, Graco spray components and Dynasolve cleaning products.

Spray Foam Service and Equipment

### New Spray Foam Insulation Systems

CertainTeed Machine Works creates customized rigs for the application of spray polyurethane foam (SPF) insulation.

First we talk to you, find out what you're looking for in an SPF system – component selection, vehicle configuration, operating conditions. Then we tap into our network of top-notch suppliers to design a system that meets all your needs. Once all the details are nailed down, we apply our extensive in-house machining and fabrication capabilities to build a custom system for you.

Contractors have commented on how neat and safe our rigs are compared to those available from other companies.

“CertainTeed Machine Works was an outstanding partner throughout the entire process beginning with detailing our requirements and continuing to provide technical support after delivery of the equipment. Given the uniqueness of our requirements, we couldn't have possibly met our expectations without the help of your company.

“Your team has been particularly impressive, going above and beyond what would be considered standard practice in the Industry. It goes without saying that we would definitely recommend you for future business opportunities.”

Spray Foam Contractor, Florida

**Self-contained Generator Rig**  
Typical System Installation

### Professional and Fully Customized System

#### OPTIONS

- Proportioner
- Generator

- Workbench
- Roof mounted HVAC unit
- Wall mounted auxiliary heater
- Sealed 48" fluorescent light fixtures
- First aid kit
- Emergency eyewash station
- Fire extinguisher
- Spill kit
- Pivoting access ladder

#### Key Features

##### GENERATOR

Adequate electrical supply is important in the day-to-day operation of any spray polyurethane foam rig. Operating your proportioner, air compressor and other electrically driven components at the required voltage will extend their service life and limit downtime. We accurately size the generator to match your rig requirements.

##### COMPRESSOR

Material transfer pumps, mixers, spray guns as well as fresh air systems depend on compressed air to operate at their full potential. As with the generator, proper sizing is necessary. We have compressors and air dryers available to ensure a dependable air supply throughout the rig.

##### QUALITY CONSTRUCTION

Providing quality equipment, service and customer support to the insulation industry has been our priority since 1936. This dedication to our insulation application equipment and systems has earned CertainTeed Machine Works a respected reputation as a leader in the industry.

##### SAFETY

Every CertainTeed Machine Works application system is designed and manufactured with safety in mind. From our optional pivoting entry ladder to the emergency eyewash station, our dedication to safety is evident in every aspect of our business, from concept, to manufacture, to field use.
