

Ultimate Cellulose Wall Spray System

The revolutionary Multi-Matic™ wall spray system is specifically designed for cellulose sidewall spray and dense pack/cavity fill applications. The system includes a single machine that performs three separate functions along with the required Multi-Tank™, a 250-gallon heated and insulated stainless steel water tank (sold separately). The Multi-Matic sprays cellulose insulation into the wall cavity, recovers excess material using the machine-installed vacuum and returns it to a separate holding hopper, where it is metered into the flow with new insulation. The Multi-Matic is designed to optimize spraying efficiency while minimizing set-up and take-down time.

Features & Benefits

- PTO (power take-off)
- Fully hydraulic drive system
- Built-in 10,000 kW generator
- Positive displacement blower
- Outside blower air intake
- Expanded hopper
- Independent material control slides (new and recycled)
- Integrated vacuum system
- Fully sealed blow-through air-lock feeder
- Heavy-duty gearbox
- Panel-mounted tachometer with hour meter
- Automatic backflow check valve
- Adjustable drive belts
- Electrical overload protection
- Self-aligning sealed bearings
- Wired remote control
- Integrated safety features

ALSO AVAILABLE

- Multi-Tank water system (required for this model)
- Wireless remote control
- Blowing hose
- Vacuum hose
- Couplings and clamps

Multi-Matic™

Wall Spray System

Insulation

- Cellulose

One Model Available

- MMPTO – Power take-off

Specifications

- Typical feed rate:
 - Cellulose – 14-20 lbs./min.
- Load height: 65"
- Height: 95"
- Width: 84.5"
- Depth: 80"
- Weight: Approx. 3,100 lbs.

Feature Details

FULLY SEALED BLOW-THROUGH AIR-LOCK FEEDER – Seals pressurized airflow to provide installer with a consistent flow of conditioned fiber.

INTEGRATED VACUUM SYSTEM – Allows scrubbed or recycled material to be returned to the machine for remix into the blend.

ACCUMULATOR PREFILL SWITCHES – Panel-mounted rocker switches allow the accumulator chamber to be pre-loaded with fiber to ensure smooth flow on startup.

MATERIAL CONTROL SLIDES – Secondary volume and conditioning controls. Allows operator adjustment of new and recycled fiber flow to the shredder.

MECHANICAL OVERLOAD PROTECTION – Hydraulic relief valves protect the internal hopper components and air-lock feeder from foreign objects.

REMOTE CONTROL – Gives installer the option of selecting air only or air and fiber from the point of application.

POWDER-COAT FINISH – Durable, long-life protection for your investment.

INTEGRATED SAFETY FEATURES – Emergency stop switches; electrical interlock; front, rear and side guards.

SELF-ALIGNING SEALED BEARINGS – High-quality bearings are used throughout the CertainTeed Machine Works product line. They are sealed to keep out dust and equipped with Zerk fittings for proper maintenance.

ADJUSTABLE DRIVE BELTS – Special belt-tightening screws make it easy to keep the belts properly tensioned as they wear.
