

# Tuff Face Insulation

## Superior Condensation Blanket

### Description

Our Tuff Face Insulation Blanket is a wide-width condensation blanket consisting of a white, woven fabric, and insulation blanket, designed specifically for agricultural construction in new or retrofit applications. It is often referred to as 'peck proof' because of its bird resistant qualities.

By combining the formaldehyde-free JM Condensation Control Blanket® with a fabric that has outstanding UV protection, elongation, and barrier characteristics, we have fabricated a product that is top of the line.

*Tuff Face Insulation is available in custom length rolls that are 3', 4', or 6' wide with the convenient option of having one 6" or two 3" tape tabs.*

***When a superior condensation blanket is required, turn to our Tuff Face Insulation Blanket.***

Coating Thickness:	1.0/1.2 mil ea. Side (+/- 10%)
Weight:	3.2 oz./sq.ft. (+/- 10%)(ASTMD-1910)
Tensile Strength:	100 lbs. warpx 105 lbs. weft (ASTMD-751, Grab)
Tear Strength:	35 lbs. warp x 30 lbs. weft (ASTMD-751, Tongue)
Bursting Strength:	210 lbs. (ASTMD-751, Mullen)
Thickness:	5 Mils (+/- 10%)
